

VIKING BLUE

WIRELESS MASTER SLAVE GATE OPERATION

Viking Blue Software works on any PDA or Smartphone

Gate operator master/slave installation is easier than ever with the new Viking Blue. This plug and play, wireless communication system has a range of up to 100 feet.

The Viking Blue also offers a simple diagnostic system. These wireless diagnostics not only allow remote operation of timer adjustment, obstruction sensor and fine tune settings but also run pre-programed self diagnostics and technical data transmission to Viking support centers nationwide.

 Bluetooth™

gate operation, diagnostic and setup

USING BLUETOOTH TECHNOLOGY

VIKING BLUE

ADVANCED FUNCTIONS AND TECHNOLOGY

VIKING VOICE RECOGNITION

Uses a state of the art algorithm, speaker independent , accent independent and noise cancelling. Allows the use of voice commands for all functions available in the Viking Blue Module

VIKING SPEECH TECHNOLOGY

Intelligent speech technology allows the gate operator to communicate verbally with you, answering questions related to the state of the gate operator and commands.

VIKING INTERFACE

The Viking Blue Module uses a graphical interface to visually find voltages, amperages and other various setting and functions of the gate operator.

VIKING BLUE MASTER SLAVE

Forget about wires! The Viking Blue module establishes a reliable wireless communication between master and slave operators up to 100 feet in range.

VIKING BLUE TELESERVICING

The Viking Blue module is capable of diagnosing the gate operator and communicating the results to the Viking Tech Support Line, allowing rapid troubleshooting and resolution.

VIKING BLUE SPECIFICATIONS

Supports Bluetooth 2.1/2.0/1.2/1.1. Profiles: SPP. Class 1 FHSS (Frequency Hopping Spread Spectrum) 128 bit encryption. Error correction schemes for reliability.

Approvals: FCC ID: T9J-RN41 • ICS: 6514A -RN41 • CE: 0681
